

"YOU MIGHT AS WELL RENT THE BEST"

# GUZZLER CLASSIC

**Original  
Workhorse**

*The Guzzler CL is a powerful and efficient industrial vacuum system designed to clean up and recover a full spectrum of materials - from solids and dry bulk powders, to liquids, slurries and thick sludge. Depending on material type, it can operate effectively in remote or inaccessible locations more than 1,000 feet away. The Guzzler CL is simple to operate and easy to maintain. It provides 100% accessibility to all internal chambers, and provides the lowest air to cloth ratio of any machine in its class.*

## **All VTR GUZZLER CLASSIC's Feature:**

- **Positive Displacement Blowers**

Airflows from 0-6000 CFM's  
Negative pressures from  
0-28.6 inches of mercury  
Direct driven through an air  
shift OMSI heavy duty  
transfer case  
6 inch air operated  
relief valve  
Ultra-Quiet silencer

- **18 Cubic Yard Debris Body**

Manufactured from corrosion  
and abrasion steel  
Liquid level float indicator  
Hydraulically opened, closed,  
and locked rear door  
Debris body hydraulically  
raises and lowers  
Debris body dumps at a  
50 degree angle

- **4 Stage Air Filtration System**

60 filter bags 70 inches long  
120 psi bag cleaning pulsation  
system  
Cyclone centrifugal separator  
Stainless steel ball float shut-off  
Stainless steel micro strainer

- **Other VTR Guzzler Classic  
features**

Top loading hydraulically driven  
8 inch boom rotates 270  
degrees  
Color coded, function stamped,  
wiring harness  
Decant valves  
Read door prop  
Externally mounted and sealed  
control panel with tachometer,  
blower hour meter, and  
pulsation system air pressure  
gauge  
Bolt on baghouse dump chutes  
Roadside emergency kit and fire  
extinguisher  
HIGH RAIL units for railroad  
projects also available

"YOU MIGHT AS WELL RENT THE BEST"

# VACTOR HXX

**Hydro-Excavation**

***Hydro-excavation is safest and most productive and non-destructive excavation method available.***

***The Vactor HXX PD offers high performance excavation in a single unit that minimizes the safety and financial risks associated with underground utility strikes. Utilizing high pressure water, and a powerful vacuum system, the HXX can perform virtually any excavation project and can operate as far away as 1000 feet from the unit. The VTR HXX units all come ready to work in any weather condition and all have heated high pressure water system which includes a 20 GPM water pump and a 940,000 BTU boiler, and heated cabinets for cold weather operation.***

## ***All VTR Vactor HXX PD Hydro-Excavation units feature:***

- **Positive Displacement Blowers**  
Positive displacement blower rated at 0-6000 CFMs  
Negative pressure from 0-28.6 inches of mercury  
Direct driven through an air shift OMSI heavy duty transfer case  
6 inch air operated relief valve  
Ultra-Quiet silencer
- **12 Cubic Yard Debris Bodies**  
Manufactured out of corrosion and abrasion resistant steel  
Hydraulically opened, closed and locked rear door  
Debris body hydraulically raises and lowers  
Debris body dumps to a 50 degree angle  
Dual 10 inch stainless steel ball float shutoff system  
7 foot hydraulic extendable booms offering reach of 22 feet off centerline of truck  
270 degree rotation on extendable boom
- **Water Systems**  
1200 gallon fresh water tank  
Hydraulically operated 20 GPM triplex 2500 PSI water pump  
940,000 BTU/hr water heater  
Heated cabinets for cold weather operation  
Handgun with 75 feet of 3/8 inch hose  
Multi Flow controls for water pressure adjustment
- **Other VTR HXX Features**  
Controls include includes tachometer and hour meter for chassis and blower  
Wireless remote control system  
Pendant control with 75 feet of wire and plug  
Vapor sealed and moisture proof electrical system protected by circuit breakers  
Hydraulic tool package  
25 feet of water fill hose  
Water level indicator with low level alarm  
Shock mounted light bulbs
